Multicultural Summer Undergraduate Research Experience (IM-SURE) in environmental biology at the University of Montana provides a hands-on research experience in the areas of microbial, plant, and/or wildlife ecology during a nine-week internship based at the University of Montana in Missoula, MT or at the Flathead Lake Biological Station near Polson, MT.

**Introductory internships available in Western Montana for undergraduates with minimal to no research experience.**

Internship Experiences Include:
- Field research, laboratory research, or both with nationally & internationally recognized Faculty Mentors.
- Participation in the community of science via participation in roundtable discussions, guest lectures, and workshops.
- Experience in communicating science to a broad audience via participation in the OREOS Undergraduate Research Symposium.

IM-SURE Provides:
- Travel to Missoula, MT.
- On-campus housing for the duration of the internship period.
- Subsistence support of $100/week.
- Up to $500 in research support.
- A taxable stipend in the amount of $4,500 ($500/week) for the nine-week internship period.

Underrepresented minorities, women, and first-generation college students are strongly encouraged to apply.
